Wood Spends \$200 Day on Flash Through Spain

SALS FOR HOME WITH \$2 BILL

Friends Dig Deep as "Greatest Spender" Enjoys One Last Tour de Luxe

Cádiz, March 12 (Copyright, 1925, LNA).—After a two weeks de luxe tour of Spain, the bills for which footed more than \$200 a day, Lieutenant Osborne C. Wood, son of the Governor-General of the Philippine Islands, sailed from Cádiz Harbor today aboard a homeward-bound freighter with only \$2 in his pocket.

His bill for the last five days at the Hotel Franchise of Cádiz was paid by his friends. His passage to Tampa, Fla., aboard the United States shipping boat freighter West Chas was granted by the London office of the Shipping Board.

Wood's gas trip through Spain after his last departure from France, where unpaid checks for 15,000 francs in gambling debts resulted in charges against him by the Madrid Casino, has been the sensation of the Spanish newspapers for the last fortnight.

His quarters—generally the royal suite—in exclusive hotels of the five principal cities of Spain have been stormed by armies of reporters seeking interviews with the youth they called "the world's greatest spender."

SEES CHANGE IN LUCK.
Because of his carefree liberality he was tagged by a squad of boot-leggers, beggars, newsboys and lottery ticket vendors with ready smiles for their patron and ready salutes for his excessively large tips. He purchased scores of tickets for the government lottery which will be drawn today, a few hours after he calls.

"Too bad the drawing comes after my sailing," Wood remarked, "because otherwise I must have some spending money on my arrival in America."

"I am very sorry the present Spanish government prohibits gambling because I feel luck has changed in my favor and I am sure I could clean up if the casinos were open. Then I'd be able to extend my tour to Africa instead of returning to America aboard this freighter."

His superstitious belief in his luck has become almost a religion. Wood, who is confident that the luck which made him a fortune in Wall street then turned against him, again will turn in his favor.

SILENT ABOUT HIS WIFE.
Just before heading the West Chas, he astonished an old woman from whom he bought another lottery ticket by giving her 12 for a 50-cent ticket. He asked a friend to be sure to get a list of the winning numbers and send them to him by wire at sea. If he was a winner, when a reporter asked why he did not go to a cheaper hotel in his last days in Cádiz and save money for his return to America, Wood replied:

"I never worry about financial questions. It's always possible to find money if you know where to look."

Wood's bill for a two-day stop at the Hotel Maria Christina at San Sebastian was nearly \$200, which included bills for nine bottles of champagne, seventeen bottles of cognac and eleven bottles of beer.

He wanted to take some wine aboard the ship but was prevented by Captain Lende.

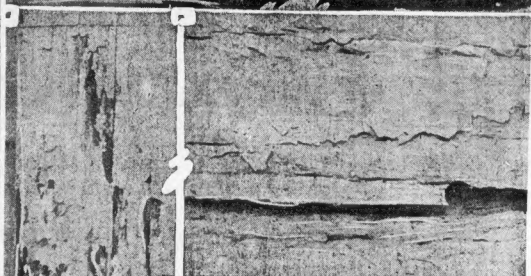

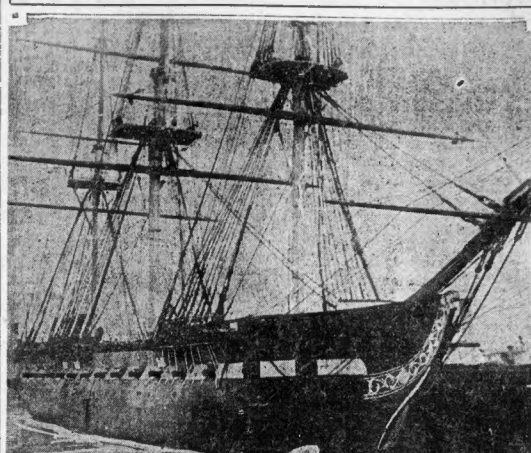

Young Wood refused to discuss his wife's reported divorce phase. A telegram offering him \$5,000 a week in gold to "allow back tricks" caused his wrath and he flung it into the sea.

PLAYRIGHTS TO PLEAD BEFORE SHOW JURIES

New York, March 12.—District Attorney Nathan A. Spaulding today announced that he will ask the playrights to appear before a citizen jury in defense of any production that may be on trial for obscenity or immorality.

Such a provision had been obtained in an amendment to the original citizen jury conservancy plan, and was inadvertently omitted when the bill was presented to Mr. Spaulding by officers of the joint committee opposed to political censorship.

"OLD IRONSIDES" TO BE SAVED

The frigates "Old Ironsides" as she appears today tied up at a wharf at the Charlestown Navy Yard (upper). (Lower right) Shows a part of the taffrail, cracked and rotted away. (Lower left) Shows the stump of the foremast, decayed and in danger of falling.

Prompted by his great love for all things pertaining to the sea and his ardent patriotism, Daniel Jennings, No. 1 Stevens street, West End, sent to Secretary of the Navy William D. Taft, the first dollar of the fund which is being raised to reconstruct the old frigate "Constitution" of Revolutionary fame.

Mr. Jennings, who is seventy-two years old, served as a ship boy through the Civil War on the gunboat Delaware under the command of Captain Sigsbee, who also claims Boston as his residence.

When he was fourteen, Mr. Jennings enlisted in the navy and served through the entire war.

"I am a sailor and I love ships," he said when asked why he contributed to the fund.

He earned his living as a cook until age rendered him incapable of working and now he runs a lodging house on Stevens street.

BUDLONGHUNT FOR PAIR OF MISSING GIRL

Huge Bills Were Contracted by Wife Before She Began Suits

Newport, R. I., March 12 (Universal).—Milton J. Budlong, millionaire automobile and oil king of New York and Newport, has gone on a check-writing jag today.

He signed away literally thousands of dollars in payment of an accumulation of debts made by his wife, Mrs. Margaret W. Budlong, before her recent spectacular "hunger strike" in his luxurious New York apartment, it became known here.

The bills, said to be huge, were contracted by Mrs. Budlong before she left this city to go to New York, immediately after she lost a separation suit here. They covered such items as groceries, automobile hire, clothing and candles.

While her husband was paying these bills, Mrs. Budlong was today said to be still in an exclusive rest hotel in or near New York. Unsuccessful in her suit for separate maintenance and custody of the two minor Budlong children, the wife is rumored to have "quit."

Information received from her today declared that New York is her home and that she has put aside Newport as a legal residence. Recent rumors that the couple had become reconciled could not be verified.

Chosen as Juror

Newburyport, March 12.—The City Council met last night and chose Orlan Webster as a juror for the Salem sitting of the Superior Court.

When Mrs. Benjamin F. Perkins was beaten and robbed of thousands of dollars' worth of jewelry in New York it brought about a reconciliation with her husband, from whom she had separated several years. Photo shows reunited couple, Mrs. Perkins still wearing bandages and bearing marks inflicted by three masked men in her apartment.

SOCIETY BRIDE CHEERS JAIL HUSBAND

New York, March 12 (U.S.S.)—Steel bars will not shut Jack Sedlow out of the heart of his bride.

Seventeen-year-old Mary Woodson, of Washington, a society girl, who was discovered married to the livery wagon driver after her mother had searched eighteen months.

Sedlow was in jail today for violating his parole from Elmira Reformatory, where he had been sent after conviction for thirty robberies in New York in 1922.

"I don't care what he's done, I love him," weepingly declared his young bride. "He's always been good and kind to me and I'm going to stand by him now."

The arrival of faith was made in the Tumbas when the girl wife had come to see her husband, but was refused her request.

"You will stand by him, too, won't you, mother?" asked Mrs. Sedlow. There was a nod of the head from the mother, Mrs. Ada B. Woodson, Washington society matron.

Mrs. Woodson then sent a messenger for candy and cigarettes for the prisoner. With these went an affectionate note from the bride.

"Nothing they can ever do will make me change. I'll always love him—always," sobbed the bride as her mother led her from the jail.

Sedlow is confronted by eighteen months and twenty days before he can return to his Brooklyn flat. Sedlow is twenty-nine years old.

PAIR OF MUSK OXEN JOIN HUB ZOO

Rare Animals From Greenland Make New Home in Franklin Park

Two of the latest arrivals at the Franklin Park Zoo, who have registered for a long stay in our midst, are a pair of musk-ox from the wilds of Greenland.

The oxen, which were acquired by Deputy Commissioner William P. Long of the Park Department, are exceedingly rare in this country, the only others being in the Bronx Zoological Garden, New York.

Boston obtained the animals from Norway. They were brought to Norway by a Norwegian sea captain and purchased with the assistance of the Norwegian vice-consul of this city.

They are said to be the finest animals of their kind in captivity. About two and a half years old, they have yet to attain their full growth, standing between two and three feet in height, they make a striking picture.

The outer covering of the animal is coarse hair, which protects the under coat, a silky texture. This allows it to shed water, snow and sleet.

The horns of the oxen protrude from

B. J. BOASTS UNIQUE GERMAN SOCIETY

A utopia in reality, a contribution to the ideal of the world by the coeds of Boston University, is in existence of Liberal Arts College. An organization, known as the Deutsche Vereinigung, consisting of students of German, meet informally once a week. There are no officers, not even a secretary, and no dues are imposed upon the members. Yet these who gather lay claim to being as large an audience as ever attend a college club.

In a few days the club presents two short plays which Professor Purdie has been coaching. The proceeds of the plays will be sent to Germany to a foreign instructor who is now studying at the University of Berlin and who in turn will distribute the money to German orphanages. Instrumental in starting this club are Rose, Rose, Rose Kimball and Rose Grace.

KIRSTEIN URGES MORE ETHICS IN BUSINESS

LEWIS E. KIRSTEIN, Boston merchant, emphasized the growing tendency of higher ethics in business for business' own good in an address at the West End Community House, North Russell street. This address marked the second of a series of forum meetings being conducted by this institution.

Business, Mr. Kirstein said, in many respects includes the work of such professions as medicine and law. Foreseeing business men, he said, realize today as never before the tremendous value of preventive medicine and the need for its support by business for the benefit of employees. Employees also, he declared, are entitled in some measure to the advice of their employers on legal and other problems. The whole range of business methods, he pointed out, is daily making a profession of what came until recently under the general, non-technical head of business.

Failure to Report Subordinate's Dereliction Draws Record Punishment

Providence, March 12.—The most drastic punishment ever meted out to a member of the fire department was drawn by Captain Albert C. Hammond of Ladder 4, who today stands demoted to the rank of private.

Hammond loses the sum of \$1 a day as the result of his demotion for failing to report neglect of duty by a member of his company, Private Lloyd P. Shippee.

500 ALGERIMS DEPART FOR PALESTINE

York to Attend Opening of New Hebrew University

Today is the most eventful day in the life of American Jewry. This statement comes from Louis Lipkay, chairman of the National Executive Committee, Zionist Organization of America, and the only American member of the World Zionist Organization.

Leaving today from New York City on the steamship President Arthur are 500 American Jews sailing under the Zionist flag directly bound for Haifa, Palestine, where they will be eye-witnesses on April 1 of the opening of the New Hebrew University on Mount Scopus, Jerusalem.

Representative is the completion of the university. It proves that the Jews are above everything else a literary and cultural people, sponsoring the growth of institutions of learning before all else.

Isaac Carmel, field secretary of the Zionist Organization of America, in an interview with the Boston Evening American reporter, revealed many interesting things about the Holy Land and Zionism. Mr. Carmel is touring the New England States under the auspices of the New England Zionist League.

"There is no more opposition to Zionism. The back of the opposing element has been broken. This opposing element consisted of two factions: the reformed rabbi and the orthodox rabbi. At the present time, the orthodox American rabbi, although they don't stand behind the Zionist movement, the reformed members have nevertheless officially endorsed it."

"Contributors to Palestinian funds of all kinds number 100,000, although the actual membership in the American Zionist organization is 50,000."

"In the last four years the Jewish land possession in Palestine has more than doubled. Its population has increased by 75 per cent. At the end of the war there were 6,000 living on the soil. Today there are 25,000 people living and gaining their livelihood thereby. In the last few years industry has been introduced into Palestine and Haifa and Tel Aviv, the two principal cities have flourished greatly. At this early stage there are a number of factories."

"An oil refinery built on a capital of over half a million dollars, a flour mill owned by Rothschild family, built at a cost of a million dollars, and a large cement factory are among the largest buildings."

"Also a Vienna Jew is now building a huge silk factory in Tel Aviv and a group of Jews from Lodz, Poland, have opened a textile factory."

"Of considerable importance are the tobacco fields which have netted the people thousands upon thousands of pounds of tobacco. In New York city a cigarette factory is now in the process of construction to handle the Palestinian tobacco. In a concentrated effort to introduce cigarettes into this country as a Palestine product, American markets will be solicited."

"Americanism from A to Z" will be the subject of an address by Abraham Albert, president of the Boston Jewish American, at the Williams School hall in Chelsea on Sunday evening next.

On the following Tuesday night, will be the principal speaker at the mass meeting held by the Charles Laidler Charitable Society at the Walden Street Synagogue for the purpose of opening a membership drive.

Rabbi A. Kilmanov has been duly installed as the rabbi of the Anshei Lubavitch Congregation of 11 West End, and officiating the installation a luncheon was tendered him.

The Theodore Herzl Club of Boston, of which David A. Lourie is honorary president, and Samuel L. Dana, president, will give an informal luncheon in honor of the noted Jewish philanthropist, Louis Lipkay, editor of the New Palestine, Journalist and critic, at the Boston City Club tomorrow noon at 12:30.

EXTRA TAX OF \$10,000,000 ON COUZENS

Treasury Plans Special Levy on Senator's Profits in Ford Stock Deal

Washington, March 12.—The Treasury has prepared for delivery to Senator Couzens of Michigan a notice of an arbitrary assessment of profits alleged to have been made by him in the sale of his minority holdings of stock in the Ford Motor Company in 1919.

While the computation of the assessment is practically complete, it is the intention of the Treasury to withhold it for one day to give the Michigan Senator, who is chairman of the special committee investigating the Internal Revenue Bureau, a chance to sign a waiver of the statute of limitations, if he so desires.

The Treasury sent to the Senator Monday a copy of a memorandum from a private source outside of the Treasury purporting to show that profits he had made on the sale of the stock to Henry Ford had been under-assessed and that between \$10,000,000 and \$11,000,000 still was due the Treasury. The exact amount of the proposed assessment was not made known.

At the same time Senator Couzens declared in the Senate an attempt was being made to discipline him for his activities in investigating affairs of the Revenue Bureau.

In the face of charges that the government had been deprived of more than \$800,000,000 in corporation taxes, through excessive post-war amortization allowances, the case of the United States Steel Corporation was being made by the Bureau of Internal Revenue. It was disclosed today in testimony before the Couzens investigating committee.

It is specifically charged that the Steel Corporation saved \$8,000,000 through liberal amortization allowances.

WORLD PEACE IS FRENCH OBJECTIVE, SAYS HERRIOT

Paris, March 12.—Premier Herriot, addressing the American Club at luncheon today, said: "My government has two objectives: First, to restore world peace; every more I make I have an eye on this end. Second, we wish to restore French finances, because French financial and monetary peace is essential to international peace. When financial restoration is achieved we can settle our war debts in a spirit of justice, equity and friendliness. You can count on my government and I count on America's great moral force to aid us."

Ten pairs of admissions to "The Music Box," one of Boston's best dance halls, are offered as special prizes for clever "last lines" to tonight's Limerick.

These admissions will be presented through the courtesy of Walter H. general manager of "The Music Box," which is situated on Huntington avenue, opposite Symphony Hall, in the heart of the Black Bay amusement district.

Limerick has who win these prizes are assured of an unusually pleasant evening, as "The Music Box" has one of the best dance orchestras in New England. Mr. Hall will personally greet the winners when they arrive at the charmingly appointed place of entertainment over which he presides.

How would you like to win first prize of \$25 on your first try? This was done by Miss Casandora Thayer, No. 158 Chestnut street, Quincy. In telling of her good fortune she wrote:

"It was a surprise and great pleasure to read of my good fortune in the Boston Evening American. I consider myself especially lucky in winning first prize, as it was my first attempt. I want to thank you for the very generous award."
Mrs. J. S. Frank, No. 30 Buckminster street, Brighton, wrote:
"I must say in all fairness to my sisters that while I was terribly disappointed in not being the winner of any of those I submitted, I could not help but see after reading those selected how much better they were than mine. However, I am not going to say 'Oh, but keep on trying' and perhaps write something really good yet and so win a prize."

JAIL TERM PROVIDED FOR ALTERING AUTO NUMBERS

The judiciary committee reported a bill carrying a fine of \$400 or one year's imprisonment, or both, for the willful alteration of the serial number of an automobile. The bill provides that if a person who is licensed upon persons who try to sell an automobile, the serial number of which has been falsified,

To mothers of boys
with hollow legs

Feed 'em this new kind of Soda Cracker

The flavor of this cracker goes much to its shape (patented). The notched sides form a hollow space the shape of a cracker as they bake. This causes the cracker to break through and through baking. In addition this cracker is more convenient to eat—doesn't crumble and can readily be split in two.

The wonderful energy value of this FULL GRAIN PROCESS soda cracker

Aside from its taste, this new cracker is high in calories (energy value). Compared to the other things you eat, it ranks way up at the top—see table at right. Four crackers contain 100 calories. This is fuel for the human engine.

Plumpness—Notice that these crackers are round, well fed beauties—and not thin or flimsy. They have substance and body and are free from any puffing or flat taste—thanks to the process.

This starts with flour, and flour blending is a real task. Keeping the blend always the same is an even harder one. Notice how your favorite flour seems a little off at times.

Again, take the baking temperature, the question of dough working—there is a whole science in handling dough. You can't under-work it, and you can't over-work it.

It is in perfecting all the steps from flour to package that Sunshine Bakeries have, after months of study, perfected this new soda cracker. That is what the Sunshine Bakeries are constantly trying to do, and we sincerely hope, in this case have done.

Better Than Any Other Face Powder

Up to the time of La-May (French, Poudre L'Amé) it was almost impossible to get a face powder to work up without looking like chalk. La-May has a quality new to all powders because it wonderfully takes the skin into complete complexion without "pattening" the skin and showing noticeably as it takes. It takes the skin into giving a pretty soft finish and stays on like a skin.

If you really want a face powder of the greatest benefit to your skin be sure to select La-May. It is the purest and finest ingredients prescribed by doctors and scientists.

It corrects and prevents enlarged pores, blackheads and irritations. It is the favorite of the most intelligent American women are praised for La-May; they say it keeps the skin young, stays on longer and looks better than any other powder.

Girls, if you honestly value your skin, if you are tired of the charms of a lovely complexion will never be satisfied until you get your skin the lasting benefit of the beauty of La-May. La-May is sold everywhere at thirty, twenty cents, sixty cents and one dollar. In White, Flesh, Brunette and Tan.

Remember, you are offered five thousand dollars if you can buy better, a purer, a finer or more beautiful face powder than La-May.

FINANCE STOCKS NEW YORK STOCKS

By B. G. Forbes

What advantages those of us who are fortunate enough to live in the United States have over those who live in other countries.

One can be sure to be well and safe in order to acquire ownership of much of property.

Last Summer I visited my native land which I left thirty years ago. What did I find? Hardly a single sign of progress. The local village had not grown one iota. Not a single new industry had been established. The population had decreased rapidly and the standard of living was lower than it had been when I left.

The mid-west, however, has been a larger factor in unsettling the coast trade this year, and we do not look for that market to be so good as the one in New England.

Edward L. Dehany, pioneer and chief broker of the Boston office of the American Standard Oil Co. in New York, said that the market for oil was not so good as it was in the past.

I was told that millions were made in America, that nobody in that part of the country ever became a millionaire.

Even so, I did hear of one enterprising young general merchant who had become relatively wealthy.

He would suggest that the farmers with hardware and livestock implements, not for so much cash, but on an agreement that the next fall or the next two or three years would become property and would be raised on the property without cost to him, until they had pocketed a certain gain. Then he said the cattle that he had raised and pocketed very big profits.

Go to almost any city or town in your own Middle West or Far West or the South, and what do you find? Why in the last few years they have doubled, tripled, quadrupled in size and real estate values have multiplied many times.

"Used that block there," a citizen will say. "Thirty years ago you would have bought half of the town for the same price."

Alas, in most of the cities shown department stores, factories or other business enterprises and told how they were started with only a few hundred dollars of capital not so many years ago, whereas now they are worth millions.

Try for a moment to imagine how much the building of railroads alone has added to the value of real estate in this country. It is not the building of railroads that has done it, but the fact that the building of railroads has created by the building of urban and suburban trolley lines.

Consider, too, how the establishing of electric power plants has enabled cities, towns and other communities to expand and flourish.

Without the assistance of any genius or any particular business plan, the part of the land and holding on to the land, have been the greatest of the modern world.

MOHAIK CLIP FOR YEAR IS REPORTED CLIP

The 1924 Mohaik clip in six States has produced 88 per cent. of the United States supply totaling 1,171,000 pounds. The Department of agriculture estimated, today, that the clip was 8,811,000 pounds, which produces about 88 per cent. of the country's crop.

What advantages those of us who are fortunate enough to live in the United States have over those who live in other countries.

One can be sure to be well and safe in order to acquire ownership of much of property.

Last Summer I visited my native land which I left thirty years ago. What did I find? Hardly a single sign of progress. The local village had not grown one iota. Not a single new industry had been established. The population had decreased rapidly and the standard of living was lower than it had been when I left.

The mid-west, however, has been a larger factor in unsettling the coast trade this year, and we do not look for that market to be so good as the one in New England.

Edward L. Dehany, pioneer and chief broker of the Boston office of the American Standard Oil Co. in New York, said that the market for oil was not so good as it was in the past.

I was told that millions were made in America, that nobody in that part of the country ever became a millionaire.

Even so, I did hear of one enterprising young general merchant who had become relatively wealthy.

He would suggest that the farmers with hardware and livestock implements, not for so much cash, but on an agreement that the next fall or the next two or three years would become property and would be raised on the property without cost to him, until they had pocketed a certain gain. Then he said the cattle that he had raised and pocketed very big profits.

Go to almost any city or town in your own Middle West or Far West or the South, and what do you find? Why in the last few years they have doubled, tripled, quadrupled in size and real estate values have multiplied many times.

"Used that block there," a citizen will say. "Thirty years ago you would have bought half of the town for the same price."

Alas, in most of the cities shown department stores, factories or other business enterprises and told how they were started with only a few hundred dollars of capital not so many years ago, whereas now they are worth millions.

Try for a moment to imagine how much the building of railroads alone has added to the value of real estate in this country. It is not the building of railroads that has done it, but the fact that the building of railroads has created by the building of urban and suburban trolley lines.

Consider, too, how the establishing of electric power plants has enabled cities, towns and other communities to expand and flourish.

Without the assistance of any genius or any particular business plan, the part of the land and holding on to the land, have been the greatest of the modern world.

MOHAIK CLIP FOR YEAR IS REPORTED CLIP

The 1924 Mohaik clip in six States has produced 88 per cent. of the United States supply totaling 1,171,000 pounds. The Department of agriculture estimated, today, that the clip was 8,811,000 pounds, which produces about 88 per cent. of the country's crop.
